

PROJECT MANAGEMENT & CONSTRUCTION

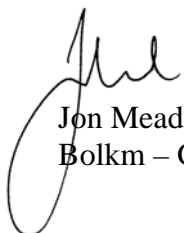

10th December 2010

Environmental Policy

Bolkm regards care and management of the environment as an important issue and will conduct itself with full consideration of the following environmental objectives.

- Adopt, implement and develop environmental management principles and practices in all construction activities in accordance with relevant legislation
- Commitment to the prevention of pollution, damage to the environment and minimise any potential impact on the community
- Commitment to continuous improvement of environmental management
- Provide training were required and information to improve awareness and knowledge of environmental issues
- Allocate adequate resources to implement environmental initiatives
- Reduce, Reuse and Recycle waste materials, wherever practical and deposit of waste materials in an environmentally responsible manner
- Application of contractor's environmental management systems to ensure company and clients environmental policies are met
- Achieve compliance with legislative requirements and current industry standards
- Purchase products which are safe and without adverse environmental impact

Bolkm shall periodically review and communicate regularly to employees, contractors, clients and government bodies.

Jon Mead
Bolkm – General Manager
